

Information for Grimsby Power Inc. customers on meters

On January 22, 2015 the Electrical Safety Authority announced it had directed Ontario's electrical utilities (local distribution companies) to replace and discontinue use of a specific model of electrical meter: the *Sensus 3.2 with remote disconnect*. There are only 5,400 of these meters reported in use in Ontario which is less than one per cent of the 4.8 million meters in Ontario.

Grimsby Power Inc. does not have the model of meters that are covered by ESA's announcement.
