Connection Impact Assessment (CIA) Fees

Generators >10kW are subject to Grimsby Power CIA fee schedule below as of September 1st, 2022.

The following fees are to complete the Connection Impact Assessment study only. Additional interconnection cost will apply based on each project during the Connection Cost Agreement Stage.

GPI CIA FEE SCHEDULE	
Nameplate Size	CIA Fee
>10kW Size ≤ 500kW – downstream of GPI owned station	\$5,000.00 + HST
>500kW Size < 10MW – downstream of GPI owned station	\$15,000.00 + HST
≤500kW – downstream of Hydro One Station	\$15,000.00 + HST
>500kW Size < 10MW – downstream of Hydro One Station	\$25,000.00 + HST

For generators on a feeder fed from a Hydro One Transmission Station, Hydro One will be required to perform its own CIA (Detailed Technical Connection Assessment - 'DTCA'), at an additional cost to the customer. Grimsby Power will apply on the customer's behalf to Hydro One DTCA.

You can find Hydro One fee, under section 'Greater than CAE – Capacity Allocation Required Projects' at: <https://www.hydroone.com/business-services/commercial-industrial-generators-and-lidcs/connection-impact-assessment>
